1. NATURE OF OPERATIONS AND ABILITY TO CONTINUE AS A GOING CONCERN

Fjordland Exploration Inc. (the "Company" or "Fjordland") was incorporated on September 19, 1996 pursuant to the *Company Act* (British Columbia) and the common shares were listed for trading on the TSX Venture Exchange ("Exchange"). The Company is in the process of actively exploring its mineral properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The Company is considered to be in the exploration stage and does not have operating cash flow.

The Company's head office, principal address and registered and records office is 1100, 1111 Melville Street, Vancouver, British Columbia, Canada, V6E 3V6.

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which contemplates that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, these financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company's continuing operations as intended are dependent upon its ability to identify, evaluate and negotiate the acquisition of, participation in or interest in new properties, assets or business opportunities, and raise additional funds by way of equity financings. Any acquisition may be subject to shareholder and regulatory approval and obtaining the necessary financing. Should the Company be unable to complete such a transaction, its ability to raise sufficient financing to maintain operations may be impaired. The available funds are insufficient to continue operations for the ensuing year. Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will be able to continue this financing in the future. These material uncertainties may cast significant doubt on the Company's ability to continue as a going concern.

2. STATEMENT OF COMPLIANCE

These consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC"). The financial statements have been prepared on a historical basis, using the accrual basis of accounting except for cash flow information. The accounting policies set out in Note 3 have been applied consistently to all years presented in these financial statements unless otherwise indicated.

These financial statements were authorized for issue by the Board of Directors on May 31, 2016.

3. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Presentation

The condensed interim financial statements have been prepared on a historical cost basis except for certain financial assets measured at fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified.

(b) Use of Estimates and Judgment

The preparation of financial statements in conformity with IFRS requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported revenues and expenses during the year.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Use of Estimates and Judgment (continued)

Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

The most significant accounts that require estimates as the basis for determining the stated amounts include the recoverability of mineral properties, valuation of share-based payments, and recognition of deferred tax amounts.

Critical judgments exercised in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are as follows:

i) Economic recoverability and probability of future benefits of exploration and evaluation costs

Management has determined that exploration, evaluation and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including, geologic and other technical information, history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in material adjustments are as follows:

ii) Valuation of share-based payments

The Company uses the Black-Scholes Option Pricing Model for valuation of share-based payments. Option pricing models require the input of subjective assumptions including expected price volatility, interest rates, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company’s earnings and equity reserves.

iii) Income taxes

In assessing the probability of realizing income tax assets, management makes estimates related to expectations of future taxable income, applicable tax opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified.

While management believes that these estimates are reasonable, actual results could differ from those estimates and could impact future results of operation and cash flows.

(c) Segmented information

The Company has one operating segment, mineral acquisition and exploration, and operates in one geographical segment, being Canada.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Adoption of New IFRS Pronouncements

The adoption of the following new IFRS pronouncements did not have an effect on the Company's financial statements:

i) IFRS 14, Regulatory Deferral Accounts is effective for annual periods beginning on or after January 1, 2016

(e) New Standards Not Yet Adopted

The Company has not yet adopted the following revised or new IFRS that have been issued but are not yet effective at March 31, 2016:

i) IFRS 9, Financial Instruments (effective date January 1, 2018) introduces new requirements for the classification and measurement of financial assets and liabilities.

ii) IFRS 15, Revenue from Contracts with Customers is effective for annual periods beginning on or after January 1, 2017.

The Company is currently assessing the impact that these new accounting standards will have on the consolidated financial statements.

4. FINANCIAL AND CAPITAL RISK MANAGEMENT

The Company's financial instruments consist of cash, receivables, deposits, accounts payable, accrued liabilities and loans. The fair value of these financial instruments, other than cash, approximates their carrying value, unless otherwise noted. Cash is measured at fair value using level 1 inputs.

Credit Risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations.

The Company's cash is primarily held in major Canadian financial institutions. The Company's receivables consist of recoveries and reimbursements for mineral property costs. Management believes that the credit risk concentration with respect to these financial instruments is minimal.

Interest Rate Risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

Liquidity Risk

The Company ensures that there is sufficient capital in order to meet annual business requirements, after taking into account administrative, property holding and exploration budgets. As the Company does not have operating cash flow, the Company has relied primarily on equity financings to meet its capital requirements. The Company is exposed to liquidity risk.

Foreign Exchange Risk

The Company is not exposed to significant foreign exchange risk as it operates in Canada and does not undertake any significant foreign currency transactions.

4. FINANCIAL AND CAPITAL RISK MANAGEMENT (continued)

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company defines its capital as shareholder's equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares periodic expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury on deposit in an interest bearing Canadian chartered bank account. The Company is not subject to any externally imposed capital restrictions.

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties, except as described below, are properly registered and are in good standing.

(a) South Voisey's Bay, Labrador

The Company, in September 2014 as amended November 2014, entered into a Memorandum of Understanding ("MOU") with Commander Resources Ltd ("Commander") whereby the Company was granted an option to earn a 75% undivided interest in the South Voisey's Bay property.

The Company has earned a 15% interest in the property by having expended $350,000 in exploration costs prior to the option agreement expiration on August 15, 2015.

The Company intends to participate in future exploration programs proposed by the operator, Commander Resources Ltd, and accordingly has a project advance as at December 31, 2015 of $29,923 (2014 - $27,533).

(b) Northwestern Athabasca Basin, Saskatchewan

In March 2016, the Company staked 44,809 hectares of mineral claims in the northwestern Athabasca basin, Saskatchewan.
